WORK EXPERIENCE

Information Technology Intern (Internship)
Teczo Sdn. Bhd.

01/2022 - 05/2022   *Kuala Lumpur, Malaysia*

Teczo Sdn. Bhd. is a Malaysian startup that provides software services & solutions, with a primary interest in the petroleum (or gas) industry.

Achievements/Tasks
- Worked in the prototyping and development of web & mobile applications, mostly through Dart & Flutter SDK, alongside Java.
- Researched and implemented new technologies (A.I, QR reading, etc.) on a variety of applications.
- Collaborated with other interns on web applications to meet project requirements and demonstrate skills development.
- Worked on solo projects after acquiring significant experience.
- Gained valuable knowledge/experience in both front-end and back-end design, more specifically with cloud services such as Firebase and AWS.

SKILLS

`Java` `Javascript` `C#` `C++` `Python` `Kotlin` `Flutter` `SQL` `React` `PHP` `Firebase` `AWS` `Figma`

PERSONAL PROJECTS

HosPal - Job-searching Mobile Application for people in the medical field. (12/2021 - 02/2023)
- Job-searching mobile application for people in the medical field. Types of users include jobseekers and employers. Jobseekers can save files (that are to be attached when applying) in a private cloud storage, browse job posts, submit job applications and review the status of each of the their applications. Employers get to create job posts, manage job applications and review jobseeker's profiles.

Patient Admission System - CLI System for managing patients in a database. (07/2011 - 11/2021)
- A system, made using C++ and linked list data structures, that consists of 2 types of users: doctors and nurses. Nurses are able to register patients, update patient information, sort patients within a waiting list and more. Doctors are able to search for patients, update their information and review a history list of all the patients that have been administered (have already met with the doctor).
