EXPERIENCE

Information Technology Intern
Teczo Sdn. Bhd.

01/2022 - 05/2022   *Kuala Lumpur, Malaysia*

Teczo Sdn. Bhd. is a Malaysian startup that provides software services & solutions, with a primary interest in the petroleum (or oil) industry.

Achievements/Tasks

- Involved in the prototyping and development of web & mobile applications, mostly through Dart & Flutter SDK, alongside Java.
- Primarily worked in backend development by connecting applications to services such as Firebase and AWS, in addition to managing other APIs.
- Contributed to project planning & software UI/UX design through design tools such as Figma.
- Designed and implemented a personalized AI chatbot within a hospital's mobile application to better guide/manage patients.
- Operated under an agile development cycle and thus, collaborated with other interns on multiple applications to meet project requirements and demonstrate skills development.

Details

- Foundation in Science & Technology.

SKILLS

Java   Javascript   C#   Python   Kotlin   Flutter   SQL   React   PHP   Firebase   AWS   Figma

PERSONAL PROJECTS

HosPal - Job-searching Mobile Application for people in the medical field. (12/2021 - 02/2023)

- Job-searching mobile application for people in the medical field. Types of users include jobseekers and employers. Jobseekers can save files (that are to be attached when applying) in a private cloud storage, browse job posts, submit job applications and review the status of each of the their applications. Employers get to create job posts, manage job applications and review jobseekers' profiles.

Patient Admission System - CLI System for managing patients in a file database. (07/2011 - 11/2021)

- A system, made using C++ and linked list data structures, that consists of 2 types of users: doctors and nurses. Nurses are able to register patients, update patient information, sort patients within a waiting list and more. Doctors are able to search for patients, update their information and review a history list of all the patients that have been administered (have already met with the doctor).
